## OUTLIER FARM

Outlier Farm is a place where the practical realism of vegetable farming meets the hopeful prospects of apple orchards. While we patiently wait for our young apple trees to bear fruit, we are keeping busy by producing high quality, beyond organically-grown vegetable varieties utilizing low-tech hand tools and market gardening practices. It's our aim to preserve soil structure and eliminate weeds through keeping the soil covered as much as possible, all while producing an abundance on a small acreage of land.

Farmers in Training at the Old Fort

## THE OLD FORT

The Old Fort at Hesperus is a growing and multi-faceted answer to farmer training in the Four Corners region. Welcoming everyone from college interns for brief summer experiences to incubator farmers ready to start a business, the Old Fort offers good (and challenging) growing conditions, supportive staff, a lively farming community, and rich resources for high elevation market farming.
